

REIPOH GABRIEL BALDOS ARRADAZA

Bachelor of Science in Computer Science (BSCS)

Apolinario Mabini St., Baybay, Leyte • 0960 652 8755
• reipohgabriel13@gmail.com

EDUCATION

Ongoing

VISAYAS STATE UNIVERSITY MAIN CAMPUS

Relevant Courses Taken: Object Oriented Programming(2023), Fundamentals of Database Systems(2023), Data Structures and Algorithm(2023), Computer Organization & Architecture(2024), Event Driven Programming(2024), Application Development(2024), Software Engineering(2024), Web Systems and Technologies(2024), Platform Based Development(2025)

SKILLS

Programming Languages: C, C++, Java, Python, C#, JavaScript, R, SQL

Web Technologies: HTML, CSS, React, Tailwind, Tanstack, Supabase, Prisma, Cloudinary, Emailjs

Tools & Frameworks: Git, VS Code, Visual Studio 2022, Figma, GunaUI, Next.js, .NET, Godot, Unity, CSP

PROJECTS

CabMan

- Developed a C# desktop-based application for queue management at the VSU multicab terminal.
- Integrated a standardized protocol to improve passenger flow and staff operations.

CNN FruitClassifier

- Created an intelligent image classification application using CNN and C#.
- Classified fruits such as Banana, Corn, Cucumber, Mango, and Tomato.
- Applied deep learning and computer vision techniques for accurate image recognition.

Canvasly

- Designed an online artwork marketplace for local artists.
- Allowed artists to showcase, promote, and sell their artworks to a wider audience.
- Connected artists with art enthusiasts, collectors, and potential buyers through a digital

Rekindle

- Developed a story-based exploration game for VSU students using Unity and C#.
- Combined interactive storytelling, exploration, and immersive gameplay mechanics.
- Featured environments inspired by the VSU campus with narrative-driven objectives and character interactions.

CS3 Biometrics Attendance System

- Contributed to a biometric-based attendance management application for organizational events and activities.
- Designed the UI/UX and developed the desktop interface using C#.
- Focused on creating a clean, user-friendly, and efficient experience for attendance management.

Weather Forecast Website

- Developed a weather forecast website integrated with the Metasource Weather API.
- Displayed real-time weather information, including temperature, humidity, and weather conditions.
- Implemented dynamic weather updates based on user-selected locations.

OTHERS

Languages: English, Tagalog, Cebuano

Teamwork: Collaborated with a diverse team of 4 members, leveraging varied skills and perspectives to successfully tackle project challenges.

Communication: Enhanced project outcomes by improving information sharing and communication strategies and contributing to the delivery of a high-quality project that reflected our collective effort and creativity.
